DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-42 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 5, 7-30, and 43 of copending Application No. 09/705,630. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the instant application and those of the copending are drawn to a controlled oral release dosage form of an antihyperglycemic drug, specifically metformin, for the same purpose where agent has identical mean to plasma concentrations. It would be obvious to a skilled artisan to use the invention of the copending application in the same capacity as the instant claims. A skilled artisan would expect a controlled release oral formulation of metformin to perform identically to that of the instant claims, having the same mean time maximum plasma concentration, and be just as useful in reducing glucose levels of patients with NIDDM.

Art Unit: 1615

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Zhang et al (USPN 6,051,597), and Cheng et al (USPN 6,099,859) both disclose oral controlled release formulation of hyperglycemic agents including metformin.
